MEMORANDUM FOR RECORD

SUBJECT: Recapitulation of Address Indicator Group (AIG) Messages

1. Purpose: This memorandum is being generated to complete the requirements of validating current AIG messages. With the publication of Army Regulation 95-2, dated 29 December 2006, this regulation supersedes, incorporates and rescinds the old AIG's published by USAATCA and ATSCOM prior to 29 December 2006.
2. Discussion: The way that AIG messages were distributed has been outdated and unfunded. It is being replaced by the Defense Messaging System (DMS). Currently, DMS does not allow for timely dissemination or access by all in the ATS Community. The memorandum will be the official recapitulation and posted on the ATSCOM Web Site at <https://ats.army.mil>.
3. Action: Future clarification of standards, policies and procedures in FM 3-04.303 and deviations will be published in ATSCOM Technical Bulletin. This bulletin information can also be found at the ATSCOM web site listed in Para 2.
4. Point of contact for this action is Policy & Procedures Branch, S3, ATSCOM, DSN 558-1608 or coml. (334) 255-1608 or E-mail: afats-cs-op@rucker.army.mil.
5. "Freedom's Voice."
